

Desktop 2.0 Channel Speakers

Experience impressive audio with these desktop speakers, featuring two high-quality drivers. BassFlex technology extends low frequencies for enhanced sound.

Product Overview

High-Performance Desktop Audio

These 2.0 channel desktop speakers are designed to deliver balanced and dynamic clarity for your computer or portable audio devices. Featuring BassFlex technology, they extend low-frequency response to provide a richer, weightier sound without the need for a separate subwoofer. With a slim, stylish black finish, they integrate seamlessly into any workspace while offering convenient control options.
