

Desktop X-ray Security Screening System

This desktop X-ray system facilitates the inspection of small items. It is suitable for security checks in government agencies, mail inspection centers, and schools.

Overview

Desktop X-ray Security Screening System

This desktop X-ray security screening system is designed for efficient, non-destructive inspection of parcels and small items. Engineered for high-throughput environments, it provides detailed visualization and accurate detection capabilities to ensure safety and quality control. Its compact footprint makes it an ideal solution for facilities requiring reliable screening without sacrificing valuable workspace.

Physical Dimensions

Weight	85 kg
Dimensions (L x W x H)	1154 x 643 x 648 mm
Channel Size (W x H)	503 x 303 mm

Electrical Specifications

Power Consumption

0.5 kVA

Power Consumption

Power Source	220VAC (+10% ~ -15%), 50Hz ± 3Hz
