

Deutz Diesel Engine Power Generator Set

This diesel generator set utilizes a Deutz series diesel engine, known for its compact size, high power output, and low noise. The generator is matched with a domestic series non-brush electrical machinery.

Overview

High-Performance Power Generation

This diesel generator set is engineered for reliability, featuring a compact design that balances high power output with low noise levels. Equipped with advanced non-brush electrical machinery, it offers automatic voltage regulation and comprehensive safety features including automatic shutdown protocols for oil and overspeed conditions. Designed for versatility, the unit supports self-starting, remote operation, and 485 connectivity, making it an ideal solution for demanding professional power requirements.

Technical Features

Engine Series	Deutz Series Diesel
Generator Type	Non-brush electrical machinery

Safety & Control

Control & Connectivity

- Long-distance operation
- 485 connection support

Safety Functions

Auto-regulate voltage, Strip breakage protection, Low oil shutdown, Overspeed shutdown, Self-starting

Design & Mobility

Undercarriage & Braking

Component	Specification
Transmission System	Trapeziform wheel
Braking System	Gas checks and hand checks (dual system)

Noise Reduction

Low noise box body • High performance reduction
