

Dial Bore Gauge with 0.01mm Resolution

This high-precision dial bore gauge is designed for accurate measurement of internal diameters. It features a sensitive dial indicator with 0.01mm resolution and a measuring range of 0-3mm.

Product Overview

Precision Internal Measurement

This high-precision dial bore gauge is engineered for accurate measurement of internal diameters in demanding industrial environments. Featuring a sensitive dial indicator with 0.01mm resolution, it ensures reliable results for quality control and precision engineering applications. The robust construction includes a knurled handle for superior grip and control during measurement tasks.

Technical Specifications

Available Models and Ranges

Article Number	Measurement Range	Graduation
DG01-1011	10-18mm	0.01mm
DG01-1021	18-35mm	0.01mm
DG01-1031	35-50mm	0.01mm
DG01-1041	50-100mm	0.01mm
DG01-1051	50-160mm	0.01mm
DG01-1061	100-160mm	0.01mm
DG01-1071	160-250mm	0.01mm
DG01-1081	20-200mm	0.01mm
DG01-1091	250-450mm	0.01mm

Resolution	0.01 mm

Features

Key Features

- High-precision dial indicator
- Knurled handle for comfortable grip
- Robust construction for durability
- Wide variety of measurement ranges available
