

Diamond Core Drill Bit

This diamond core drill bit is designed for creating precise and clean holes in hard materials. It is suitable for use in drilling through tile, ceramic, glass, and stone.

Product Overview

Professional Diamond Core Bit

This diamond core bit is engineered for creating precise and clean holes in challenging, hard materials. Featuring a robust cylindrical cutting head with diamond-impregnated segments, it ensures efficient material removal and long-lasting performance. It is an ideal solution for drilling through tile, ceramic, glass, and stone, providing stability and longevity for professional applications.

Model Number

ST0007

Technical Specifications

Design Features

- Diamond-impregnated segments
- Durable metal body
- Easy core ejection design

Compatible Materials

Tile, Ceramic, Glass, Stone

Operational Guidelines

Usage Requirements

- Requires appropriate drilling equipment
- Requires water cooling for optimal life and performance
