

Diamond Core Drill Bit

This diamond core drill bit is designed for drilling precise holes in hard materials such as concrete and stone. It features laser-welded diamond segments for efficient cutting and a robust steel barrel for long life.

Product Overview

Professional Diamond Core Bit

This diamond core bit is engineered for precision drilling in demanding materials, including concrete, reinforced concrete, brick, and stone. Featuring a robust steel barrel and laser-welded diamond segments, it ensures efficient cutting performance and extended tool longevity. It is a versatile solution suitable for both wet and dry drilling applications, making it ideal for plumbing, electrical, and HVAC installations.

Technical Specifications

Drilling Compatibility

Wet Drilling • Dry Drilling

Suitable Materials

Concrete, Reinforced Concrete, Brick, Stone

Connection Type

Threaded connection for core drilling machines

Construction

Build Features

- Robust steel barrel
- Laser-welded diamond segments

Applications

Primary Use Cases

- Pipe installation
- Cable routing
- Ventilation systems
- Plumbing and HVAC work
