Overview

High-Performance Cutting Solution

This professional-grade diamond saw blade is engineered for precision and durability when cutting challenging materials like stone, tile, and concrete. Featuring a robust steel core and high-quality diamond-impregnated segments, it ensures fast, clean cuts while maintaining structural integrity. Designed for versatility, the blade performs effectively in both wet and dry cutting environments, making it an essential tool for demanding construction and masonry projects.

Technical Specifications

Operation Modes

- Wet cutting
- Dry cutting

Blade Diameter

300 mm

Cutting Applications

Stone, Tile, Concrete

Safety & Compliance

Operational Safety

Always prioritize safety during operation. Users must wear appropriate personal protective equipment (PPE), including gloves and eye protection, to prevent injury. Ensure the blade is properly mounted and inspected before use.

Compliance

Safety Standard Compliant
