Product Overview

High-Performance Stone Grinding

These diamond fickert abrasives are engineered for efficient coarse grinding, calibration, and stock removal on granite, marble, and engineered stone. Designed for automatic polishing machines, they utilize diamond segments bonded to a durable backing to ensure consistent, aggressive cutting action and long service life. This tool is essential for the initial stages of stone processing, helping to achieve a flat, uniform surface ready for finer polishing.

Technical Specifications

Dimensions & Grit Availability

| Type | Available Grits |
|------|---|
| L135 | 30, 40, 50, 60, 80, 100, 120, 140, 170, 200 |
| L155 | 30, 40, 50, 60, 80, 100, 120, 140, 170, 200 |
| L170 | 30, 40, 50, 60, 80, 100, 120, 140, 170, 200 |

Grit Range: 30 - 200

Customization: Yes
