Product Overview

High Performance Diamond Grinding Cup Wheel

This high-performance diamond grinding cup wheel is engineered for aggressive material removal and surface preparation on hard surfaces like granite, concrete, and bricks. Built with a robust 65Mn steel body and high-quality diamond segments, it offers excellent grinding speed and extended tool life. The design ensures efficient cooling and dust extraction, making it a reliable choice for professional surface finishing tasks.

Technical Specifications

Body Material	65Mn Steel
Segment Material	Diamond Grit
Manufacturing Process	Cold Press, Hot Press, Silver Welded, Laser Welded

Dimensions & Compatibility

Available Sizes	4 inch - 9 inch
Thickness Range	1.5mm - 3.4mm
Segment Height	5mm - 10mm

Application

Compatible Materials

- Granite
- Hard Concrete
- Bricks

Logistics

Available Packaging

White Box • Color Box • Wooden Box
