

Diamond Saw Blade for Hard Materials

This diamond saw blade is designed for cutting hard materials such as concrete, stone, and tile. It features a segmented rim for efficient debris removal and cooling and is suitable for both wet and dry cutting.

Overview

High-Performance Cutting Solution

This diamond saw blade is engineered specifically for demanding tasks involving hard materials like concrete, stone, and tile. Its robust construction features a steel core and diamond-impregnated segments, which work together to ensure long-lasting durability and consistent cutting performance. Designed for versatility, the blade supports both wet and dry cutting applications, making it an essential tool for professional angle grinders and circular saws.

Technical Specifications

Cutting Modes

Wet Cutting • Dry Cutting

Compatible Materials	Concrete, Stone, Tile
----------------------	-----------------------

Rim Type	Segmented
