

Diamond Saw Blade for Marble Cutting

This diamond saw blade is designed for cutting marble. It features a segmented rim for efficient material removal and a steel core for stability.

Product Overview

High-Performance Diamond Saw Blade

This diamond saw blade is specifically engineered for precision cutting of marble, making it an essential tool for stone fabrication and tile installation. Featuring a robust steel core for enhanced stability and a segmented rim design, it ensures efficient material removal while maintaining clean, chip-free edges. Designed for versatility, this blade supports both wet and dry cutting applications to suit various construction environments.

Technical Specifications

Blade Design

- Segmented rim for efficient material removal
- Steel core for improved stability
- Central arbor hole for standard mounting

Cutting Methods

Wet Cutting • Dry Cutting

Primary Application

Marble

Industry Use

Suitable Industries

- Construction
- Stone Fabrication
- Tile Installation
