Product Overview

High-Performance Turbo Diamond Blade

This hot-pressed turbo diamond saw blade is engineered for professional stone cutting and construction applications. The advanced turbo design ensures efficient material removal and superior cooling, resulting in very fast cutting speeds and an extended service life. It is compatible with a wide range of machinery, including angle grinders, circular saws, and masonry saws.

Key Features

Suitable Materials	Concrete, Brick, Granite, Marble
Compatible Machinery	Angle Grinder, Circular Saw, Masonry Saw

Technical Specifications

Available Blade Specifications

Item No.	Diameter (mm)	Bore (mm)	Thickness (mm)	Segment Height (mm)
