

# Diamond Saw Blade for Tile Stone Concrete

This diamond saw blade is designed for cutting tile, stone, and concrete. It features spiral grooves to reduce vibration and improve cooling, making it suitable for both wet and dry applications.

## Product Overview

### Versatile Diamond Saw Blade

This diamond saw blade is engineered for cutting a variety of hard materials including tile, stone, and concrete. Featuring a durable steel core and high-quality diamond segments, it is designed to deliver fast, clean cuts in professional environments. The blade incorporates spiral grooves to effectively reduce vibration and enhance cooling, promoting optimal performance and an extended service life.

## Technical Specifications

### Usage Type

Wet Cutting • Dry Cutting

### Design Features

- Durable steel core
- High-quality diamond segments
- Spiral grooves for vibration reduction
- Enhanced cooling system

### Suitable Materials

Tile, Stone, Concrete

## Usage

### Ideal For

- Professional Contractors
- DIY Enthusiasts
