Product Overview

High-Performance X-Type Diamond Saw Blade

This professional-grade diamond saw blade features an advanced X-type edge design, engineered to combine aggressive cutting capability with a fine, clean finish. Constructed with a heat-treated, high-alloy steel core, it ensures smooth operation, low vibration, and enhanced durability. Designed for versatility, this blade is suitable for a wide range of building materials including concrete, granite, brick, and masonry.

Technical Specifications

Maximum Operating Speed

13200 rpm

Max Speed

80 m/s

Max Linear Speed

Diameter	115 mm
Bore Size	22.2 mm
Segment Height	10 mm
Segment Thickness	1.2-2.0mm
Body Thickness	0.8-1.4mm

Performance & Compliance

Standards

EN13236

Materials & Compatibility

Construction Materials

- 65Mn Steel (Core)
- Diamond and Metal Powder (Segments)

Compatible Materials

Concrete, Reinforced Concrete, Granite, Quarry Slabs, Sand-lime Stone, Brick, Masonry

Packaging & Logistics

Available Packaging

- Color box
- White box
- Double blister
- PVC bag
- Blister card
