

Diamond Saw Blades

These diamond saw blades are designed for cutting materials such as concrete, asphalt, and stone. They feature a durable steel core and precision-engineered diamond segments for fast, clean cuts, as well as cooling slots to reduce heat and extend blade life.

Overview

Professional Diamond Saw Blades

These professional-grade diamond saw blades are engineered for high-performance cutting across a variety of demanding materials, including concrete, asphalt, and stone. Featuring a durable steel core and precision-engineered diamond segments, they ensure fast, clean cuts while maintaining structural integrity. Integrated cooling slots help dissipate heat effectively, significantly extending the blade's operational lifespan for construction, demolition, and renovation projects.

Technical Specifications

Key Features

- Durable steel core construction
- Precision-engineered diamond segments
- Integrated cooling slots for heat reduction
- Optimized for fast and clean cutting

Ideal Applications

Construction • Demolition • Renovation

Compatible Materials

Concrete, Asphalt, Stone
