

Diaphragm Gas Meter G1.6

This diaphragm gas meter measures gas consumption. It has an open flow rate of 2 l/h to 6 m³/h.

Overview

Precision Gas Measurement

The Diaphragm Gas Meter G1.6 is a reliable solution designed for accurate measurement of gas consumption in residential or commercial settings. Built to handle a wide operational range, this meter ensures consistent performance and durability. Its robust design makes it a dependable choice for monitoring gas usage efficiently.

Technical Specifications

Maximum Pressure (P _{max})	50 kPa
Flow Rate Range	2 l/h to 6 m ³ /h
Maximum Flow Rate (Q _{max})	0.15 m ³ /h
Cyclical Volume (V)	1.2 dm ³ /r

General Information

Model Type	Diaphragm Gas Meter G1.6
Year of Manufacture	2007
Country of Origin	China
