Product Overview

High-Performance Diesel Water Pump

This diesel-powered water pump is engineered for high-pressure water transfer, utilizing advanced engine technology for economical and efficient combustion. Designed with a durable cast iron propeller and turbine cover, it offers exceptional endurance and resistance to wear in demanding environments. Its construction ensures low noise, minimal vibration, and a compact, lightweight footprint, making it suitable for irrigation, construction, and emergency water removal.

Technical Specifications

Construction Materials

- Aluminum alloy self-suction pump body
- Cast iron propeller
- Cast iron turbine cover

Connection Type

International standard screw threads

Performance & Features

Engine Performance

Low noise, Light vibration, Economical combustion

Certifications & Quality

Certifications

CE Certified • ISO 9001

Warranty

1 Year

Warranty Period

Support & Maintenance

Included with Purchase

- Standard operation manual
- Technical maintenance manual
- Tool kits
