

Diesel Concrete Mixer with Hydraulic Tipping Hopper

This diesel concrete mixer is designed for concrete mixing in construction and industrial applications. It features a hydraulic tipping hopper for easy and controlled discharge of mixed materials.

Overview

Diesel Concrete Mixer with Hydraulic Tipping Hopper

This robust diesel-powered concrete mixer is designed for efficient mixing in construction and industrial environments. Featuring a hydraulic tipping hopper, it ensures controlled and easy discharge of materials. Its durable construction and reliable engine make it an ideal solution for projects where consistent concrete quality and operational longevity are required.

Performance Metrics

Mixing Capacity

18 m³/h

Min Output

22 m³/h

Max Output

Drum Specifications

500 L

Loading Capacity

750 L

Discharging Capacity

13 r.p.m

Rotation Speed

Technical Details

Power System

- Diesel Engine Power Source
- Total Power: 16.2 kW
- Mechanical Gearbox with Friction Clutch

Physical Dimensions & Weight

Attribute	Value
Dimensions (L*W*H)	3750 x 2240 x 3800 mm
Total Weight	2050 kg

Features

Key Features

Hydraulic Tipping Hopper • Water Pump Included • Water Level Indicator • High-Capacity Drum

Compliance & Usage

HS Code	847431000
Cement Batch Capacity	3 bags of 50kg cement per mix
