Product Overview

Professional Power Solutions

This industrial-grade diesel generator set provides a reliable and stable power solution for a wide range of environments including hospitals, hotels, and construction sites. Featuring a soundproof enclosure, it is designed for low-noise operation without compromising performance. The unit is built with high-quality components to ensure long-term reliability and precise power regulation for both prime and standby applications.

Technical Specifications

Operating Frequency	60 Hz
Fuel Type	Diesel

Features

Design Advantages

- Silent operation design
- Compact structural build
- High power margin
- Stable operation
- Advanced emergency stop safety system

Standards Compliance	International Standards, Industrial Grade
----------------------	---

Operation

Control System	SmartGen controller
