

Diesel Engine 220hp-360hp

This diesel engine delivers between 220hp and 360hp, suitable for various industrial applications. It features a robust design, water cooling, and electric start for reliable performance in demanding environments.

Product Overview

High-Performance Industrial Power

This high-performance industrial engine is engineered for demanding environments, delivering a versatile power range of 220hp to 360hp. Designed with advanced combustion technology and electronic fuel injection, it offers exceptional fuel efficiency and torque. Its robust construction ensures long-lasting reliability across heavy-duty machinery, agricultural equipment, and power generation systems.

Performance Metrics

Power Output

220 hp

Minimum Power

360 hp

Maximum Power

Technical Features

Key Technologies

- Advanced combustion technology
- Electronic fuel injection
- Optimized cooling system
- Robust, heavy-duty design

Applications & Compliance

Certifications

CE • ISO 9001

Suitable Applications

Construction Equipment, Agricultural Machinery, Power Generation
