

Diesel Engine Common Rail Fuel Products

These common rail fuel products are compatible with a range of diesel engines used in trucks. The products support engine displacements from 2.8L to 50L and power outputs from 80 to 1600 horsepower.

Overview

Comprehensive Diesel Engine Solutions

We provide a wide range of common rail fuel system components and engine parts designed for heavy-duty performance across various industries. Our product line supports an extensive array of engine models, ensuring compatibility for construction, machinery, roadway, and marine applications. By offering a mix of OEM, original, and aftermarket parts, we ensure that professional buyers can find the right balance of quality and value for their specific equipment needs.

Engine Compatibility

Supported Engine Series

ISF2.8, ISF3.8, ISF4.5, ISG11, ISG12, ISX12, QSX15, X15, 4BT, 6BT, 6CT, 6L8.9, ISBE, ISDE, ISLE, ISZ, QSB, QSC, QSL, M11, NT855, K19, K38, N14, A2300, BF4M2012, BF4M1013, BF6M1013, BFM8, TCD2012L4, TCD2013L4, TCD2012L6, TCD2013L6, 1004, 1006, 1104, 1106

Product Range

Fuel System & Injection

- Injectors
- Common Rail System
- Fuel Pipes
- Lift Pumps

Core Engine Components

- Cylinder Heads
- Cylinder Blocks
- Crankshafts
- Camshafts
- Connecting Rods
- Pistons
- Cylinder Liners
- Piston Rings
- Bearings

Auxiliary Systems

- Turbochargers
- Water Pumps
- Oil Pumps
- Air Compressors
- Belt Tensioners
- Oil Coolers
- Manifolds
- Filters
- Fans

Applications

Compatible Equipment

Excavator • Tractor • Bulldozer • Lifter • Loader • Hoister • Forklift • Bus • Boat • Trucks

Industry Sectors

Construction, Machinery, Roadway, Marine

Service & Quality

Export Regions

- Russia
- Poland
- Ukraine
- Iran
- UAE
- USA

Available Part Grades

OEM, Original, Aftermarket
