

# Diesel Engine CP125D

The CP125D is a diesel engine designed for agricultural machinery and power generation. It features a high-speed, direct-injection system for enhanced fuel efficiency and reduced emissions.

## Overview

### The CP125D Diesel Engine

The CP125D is a robust and efficient diesel engine engineered for demanding applications such as agricultural machinery and power generation. Featuring a high-speed, direct-injection system, it delivers enhanced fuel efficiency while maintaining reduced emission levels. Its compact design and durable construction ensure long-lasting performance and versatile integration into various equipment setups.

## Key Features

### Performance Metrics

**125 CP**

Model Series

### Engine Characteristics

High-Speed, Direct-Injection, Fuel Efficient, Low Emissions, Compact Design

## Technical Details

### Operational Advantages

- High-capacity fuel tank
- Easy-start system
- Durable construction
- Engineered for reliability
- Low maintenance requirements

### Primary Applications

Agricultural Machinery • Power Generation • Industrial Use
