

Diesel Engine Glow Plug

This glow plug is designed for diesel engines, providing reliable preheating for quick starts. It features a durable heating element and robust construction for efficient heat transfer.

Product Overview

High-Performance Diesel Glow Plug

This high-performance glow plug is specifically engineered for diesel engines, ensuring reliable ignition in cold weather conditions. Featuring a robust construction with a threaded body, it provides secure installation and optimized heat transfer. It is designed for automotive applications that demand consistent and dependable preheating performance.

Technical Specifications

Key Features

- Robust threaded body construction
- Efficient heat transfer design
- Quick-start heating element
- Cold weather reliability

Part Number	8052
Application	Diesel Engine, Automotive
