Product Overview

High-Efficiency Diesel Water Pump

This air-cooled diesel engine water pump is engineered for high-volume water transfer in demanding environments. Featuring a robust engine and a high-performance pump mounted on a sturdy, portable frame, it ensures stability and reliability during operation. It is an ideal solution for irrigation, construction sites, dewatering tasks, and emergency water supply needs.

Key Features

Core Features

Air-cooled, Self-priming, Portable, High-volume transfer

Applications

Recommended Use Cases

- Agricultural Irrigation
- Construction Dewatering
- Emergency Water Supply
- General Fluid Movement

Operational Metrics

Performance Metrics

80 mm

Inlet/Outlet Diameter

Safety & Maintenance

Safety and Operation

For safe and optimal performance, always refer to the provided instruction manual before operation. The unit requires regular checks on fuel tank capacity, lube oil levels, and injection timing. Ensure the engine and pump are maintained according to the service schedule to guarantee long-lasting performance.
