

Diesel Engine Water Pump

This diesel engine water pump is engineered for efficient coolant circulation. Its robust design ensures reliable performance in demanding environments, making it suitable for various applications.

Product Overview

High-Performance Diesel Water Pump

This diesel-powered water pump is engineered for high-volume fluid transfer, making it an ideal solution for irrigation, construction sites, and emergency water removal. Powered by a robust 4-stroke, air-cooled engine, this unit delivers consistent and reliable performance in demanding environments. Its durable construction and efficient design ensure long-lasting operation and optimal fuel management for professional applications.

Performance Metrics

Key Performance Indicators

1600 L/min

Max Capacity

23 m

Total Lift

8 m

Max Suction

100 mm

Inlet/Outlet Diameter

Engine Specifications

Engine Configuration

Feature	Specification
Engine Model	TD186F
Engine Type	Vertical, single cylinder, 4-stroke, air-cooling
Max Output	9.0 HP
Displacement	406 cc
Ignition System	Direct injection
Starting System	Recoil

Technical Data

Capacities

- Fuel Tank Capacity: 5.5 L
- Oil Capacity: 1.65 L

Logistics and Packaging

Shipping and Packaging

Parameter	Value
Gross Weight	71.3 kg
Dimensions (L x W x H)	655 x 500 x 610 mm
20' FCL Load	118 pcs
