

Diesel Fire Fighting Pump

This diesel fire fighting pump is designed for fire suppression use. It features a large delivery volume and high delivery head, with an aluminum alloy pump body.

Product Overview

Industrial Performance

This diesel fire fighting pump is powered by a robust industrial engine designed for demanding applications where reliability is critical. It features a high-efficiency combustion system and an easy-start mechanism, ensuring consistent power output when needed most. Engineered for low maintenance, this unit is an ideal solution for fire suppression systems, water pumping, and other heavy-duty industrial machinery.

Technical Specifications

Key Features

- High-efficiency combustion system
- Easy start mechanism
- Low maintenance design
- Durable industrial construction

Model Identifier	DEK40XE
Primary Applications	Fire Fighting, Water Pumping, Industrial Machinery, Emergency Power
