Product Overview

Precision Diesel Injection Components

These diesel fuel injection parts are precision-engineered to ensure optimal fuel delivery and efficient combustion within diesel engines. Designed to withstand high pressures and temperatures, these components promote improved fuel economy and reduced emissions. The product range includes injection nozzles, pump-elements, delivery valves, and head rotors, suitable for a variety of engine models and demanding operating conditions.

Product Range

Available Components

- Injection Nozzles
- Pump-elements (Plunger Barrel)
- Delivery Valve
- Head Rotor
- VE Pump Parts

Plunger Models

Plunger-A, Plunger-P, Plunger-PS7100, Plunger-PS8500, Plunger-AD

Market Reach

Service Regions

Africa • Europe • Middle East • Russia • South America
