Product Overview

High-Performance Trash Water Pump

This robust and versatile trash water pump is engineered to handle both diesel and gasoline fuels, making it an ideal solution for demanding environments. Designed to efficiently manage water containing debris and solids, it features durable construction with a cast iron volute and impeller for long-lasting performance. Perfect for construction sites, agricultural operations, and emergency flood control, this pump offers high flow rates and reliable self-priming capabilities.

Technical Specifications

Key Features

- Self-priming capability
- Cast iron volute and impeller
- Easy maintenance access
- High flow rate

Fuel Compatibility

Diesel, Gasoline

Applications

Recommended Use

Construction Sites • Agriculture • Dewatering • Emergency Flood Control
