Overview

PERKINS GENERATOR

A robust diesel generator set designed for industrial and residential power needs.

High-Performance Diesel Generator Set

This diesel generator set offers a versatile power solution with a capacity range from 9KVA to 2200KVA, suitable for residential, factory, and power station applications. Engineered for reliability and efficiency, the unit features advanced vibration isolation, integrated wiring, and robust industrial components. It is designed to meet international emission standards and provides consistent, high-quality power output for both prime and standby requirements.

Technical Specifications

Power Range	9KVA - 2200KVA
Emission Standard	EU II, EU IIIA
Radiator Temperature Rating	50 °C
Excitation System	Self-excited (PMG optional)

Key Features

Standard Equipment

- Vibration isolators between engine, alternator, and base
- Lockable battery isolator switch
- Industrial muffler
- Top lifting and steel base frame with forklift holes
- Drainage for fuel tank
- Integrated wiring design

Control System

AMF Function • Standard Controller • Optional Controller

Optional Equipment

- Auto transfer switch
- Paralleling switchgear
- Battery charger
- Water jacket preheater
- Oil heater
- Double air cleaner

Operational Metrics

Fuel Tank Runtime

8 hours

Minimum Runtime
