

Diesel Generator Set 85 kVA - 770 kVA

This diesel electric generator features powerful load-bearing capacity, smooth running, and low noise. It has fast and reliable cold start performance and low fuel consumption.

Overview

High-Performance Diesel Generator Series

This series of diesel electric generators offers a versatile power range from 85 kVA to 770 kVA, engineered for robust load-bearing capacity and reliable performance. Designed with advanced electronic fuel injection technology, these units ensure smooth operation, low fuel consumption, and excellent cold-start capabilities. They are suitable for diverse industrial, commercial, and residential applications requiring dependable backup or primary power.

Technical Specifications

Power Output Range

85 kVA Minimum Power	770 kVA Maximum Power
--------------------------------	---------------------------------

Emission Standards

Euro Stage II • Euro Stage III

Supported Frequencies

50Hz, 60Hz

Key Features

Performance Characteristics

- Full electronic fuel injection control technology
- High performance and reliability
- Excellent cold start performance
- Voltage stability
- Low noise operation
- Plateau adaptation capability

Design Benefits

- Exquisite and compact shape design
- Low fuel consumption
- Convenient maintenance
- Heavy-duty steel base frame
- Vibration isolators included
- Sound-attenuated enclosure for quiet operation
