

Diesel Generator Sets, 4.0 kW Rated Output Power, 50 Hz

These diesel generator sets provide a rated output power of 4.0 kW. They feature robust diesel engines, ensuring efficient and stable electricity generation.

Overview

Reliable Diesel Power Generation

This series of air-cooled diesel generator sets provides a dependable and efficient power solution for diverse applications, including construction sites, agricultural operations, and emergency backup needs. Designed for stability and performance, these units feature a robust diesel engine capable of delivering a rated output of 4.0 kW. With multiple voltage options and a compact, portable design, they offer versatile power distribution for professional and residential use.
