Overview

Reliable Power Generation

This diesel generator set is engineered for consistent performance and durability in demanding environments. Featuring a robust design with low fuel consumption, it is built for easy operation and simplified maintenance. Each unit undergoes strict assembly and testing procedures to ensure high standards of quality and reliability for diverse applications.

Key Features

Performance Benefits

- Low fuel consumption
- Easy to operate and service
- Long operational life
- Low noise emission
- Environmentally friendly exhaust

Suitable Applications

Office, Restaurant, Hotel, Building, Factory, School, Hospital

Technical Specifications

Performance Metrics

24 kW

Prime Power

28 kW

Standby Power

12 L/H

Fuel Consumption (100% Load)

Engine Configuration

4

Cylinder Count
