Overview

Versatile Power Generation Solutions

This generator set series offers a highly flexible power solution capable of operating on diesel, natural gas, LPG, and LNG. Engineered for reliability, these units support a wide range of industrial, commercial, and off-grid applications with power outputs scaling from 50kW to 2000kW. Available in open, silent, or containerized configurations, each unit is designed for stable performance and ease of integration into existing power systems.

Technical Specifications

Power Output Range

50 kW

Minimum Power

2000 kW

Maximum Power

Supported Fuel Types

Diesel, Natural Gas, LPG, LNG

Voltage & Frequency

220V - 11kV, 50Hz or 60Hz

Configuration Options

Enclosure Types

Open Type • Silent Type • Containerized

Compatible Control Systems

- DeepSea
- SmartGen
- ComAp

Compliance & Quality

Available Conditions

Brand New • Refurbished

Certifications

CE, ISO
