

Diesel Power Tiller for Agriculture

This power tiller is suitable for dryland and paddy fields. It is designed for cultivating crops, vegetables, tobacco, flowers, orchards, and gardens.

Overview

Robust Diesel Power Tiller

This diesel-powered tiller is engineered for durability and versatility in agricultural soil preparation. Featuring an all-gear transmission and a sturdy cast iron case, it provides reliable performance for small to medium-sized farming operations. Its adaptable design and power take-off (PTO) capabilities allow for seamless integration with various attachments, enhancing overall farm productivity.

Performance & Build

Engine Type	Diesel
Transmission	All gear transmission
Gear Shifts	6
Housing Material	Cast iron

Features

PTO Attachments

- Ditching machine
- Rotary machine
- Mower
- Water pump
- Pressure sprayer

Key Benefits

High Horsepower • Durable Cast Iron Case • Multi-function PTO

Handlebar Adjustability	360-degree rotation, Up-down adjustment, Left-right adjustment
