Product Overview

High-Performance Diesel Water Pump

The DWP80(E) is a robust and reliable diesel water pump engineered for high-volume water transfer in demanding environments such as irrigation, construction, and emergency water removal. It features an advanced engine design that ensures effective combustion while maintaining low noise and vibration levels. Constructed with an aluminum alloy self-suction pump body and a cast iron turbine cover, this unit offers exceptional durability and endurance for professional applications.

Performance Metrics

Maximum Flow Rate

2200 L/min

Flow Rate

Total Head

82 m

Technical Specifications

Construction Materials

- Aluminum alloy self-suction pump body
- Cast iron propeller
- Cast iron turbine cover

Outlet Diameter

3 inch

Suction Port Diameter

3 inch

Certifications & Warranty

Certifications	CE, ISO 9001
Warranty	1 year

Support & Maintenance

Included Components

- Operation manual
- Technical maintenance guide
- Tool kits
