

Diesel Water Pump for Irrigation and Construction

This diesel water pump is designed for high-performance water transfer applications. It features a robust diesel engine, providing reliable power and efficient operation.

Product Overview

High-Performance Diesel Water Pump

This diesel-powered water pump is engineered for reliability and durability in demanding environments. Featuring an advanced combustion chamber design, it offers exceptional fuel efficiency and consistent power output for continuous operation. Built with high-quality materials and a heavy-duty frame, this unit is designed to withstand the rigors of irrigation, construction, and municipal drainage tasks.

Technical Specifications

Pump Body Material Options	Aluminum Alloy, Cast Iron
Mechanical Seal	High quality ceramic

Key Features

Operational Highlights

- Easy and fast starting
- Smooth operation with low vibration
- Low running temperature for extended life
- Fuel efficient combustion chamber

Build Quality

Heavy Duty Frame • Anti-Vibration Design

Applications

Suitable Use Cases

- Plains, hills, and mountain crop irrigation
- Orchard irrigation
- Construction site water transfer
- Mining operations
- Municipal drainage
