

Digital Bluetooth Body Composition Analyzer

This digital scale uses Bluetooth to sync data with smartphones and other devices. It accurately measures weight, body fat percentage, and other key body composition metrics.

Product Overview

Smart Health Monitoring

The SS-2430 Bluetooth body composition analyzer is designed for comprehensive health tracking, offering precise measurements beyond just weight. It seamlessly integrates with smartphones via Bluetooth connectivity to synchronize your health data, making it easier to monitor trends over time. With its sleek design and durable construction, this device provides a reliable and stylish solution for daily health management.

Technical Specifications

Connectivity	Bluetooth
Measurement Capabilities	Weight, Body Fat Percentage, Ambient Temperature, Battery Level
Display	Digital
Model Identifier	SS-2430
