Product Overview

Smart Body Composition Analysis

This advanced digital scale offers a comprehensive approach to health monitoring, measuring far more than just weight. Equipped with high-precision strain gauge sensors, it tracks body fat, water percentage, muscle mass, bone mass, BMI, and calorie needs. Designed for families and professionals alike, it features a user-friendly color-coded light system to provide instant feedback on body fat levels.

Technical Specifications

Max Weight Capacity

180 kg
Capacity

Platform Dimensions	319 x 319 x 21 mm
Display	LCD with blue backlight (35 x 78 mm)
Power Requirements	3 x 1.5V AAA batteries

Key Features

Operational Features

- Step-on technology
- Auto-off feature
- Overload indication
- Low battery indicator
- 3-color fat percentage feedback light

Analysis Metrics

Body Fat %, Body Water %, Muscle Mass, Bone Mass, BMI, KCAL

User Profiles

10

Construction

Platform Material

6mm Tempered Glass
