

# Digital Camera

This digital camera captures high-resolution images and videos with clarity. It features advanced settings and user-friendly operation for both amateur and professional photographers.

## Product Overview

### Precision Grain Sorting Solution

This sophisticated grain color sorter is engineered for the precise sorting of grains based on color variations. Utilizing advanced optical sensors and high-speed processing, it effectively identifies and removes discolored or defective grains to ensure superior product purity. Designed for efficiency, the machine features multiple channels for high throughput and a user-friendly interface, making it an essential asset for grain processing facilities.

## Technical Capabilities

### Key Features

- High-speed processing
- Multiple sorting channels
- User-friendly interface
- Robust construction

### Technology Type

Optical sensor-based color sorting

## Performance Metrics

### Performance Highlights

**1 High**

Sorting Precision

**1 Automated**

Operation

## Certifications & Compliance

### Compliance

Industrial Grade, High Throughput
