

Digital Display Hot Air Blower

This hot air blower is designed for applications requiring controlled heat. It features a digital display for precise temperature control between 50-350°C and 50-550°C.

Overview

Professional Digital Hot Air Blower

This professional-grade hot air blower is engineered for precision and versatility in industrial and maintenance applications. Featuring an integrated digital display, it allows for accurate temperature monitoring and control, making it ideal for tasks such as heat shrinking, paint removal, and plastic welding. Its adjustable temperature and airflow settings ensure optimal performance across a wide range of materials.

Technical Specifications

Power Rating

1600 W
Power

Power Supply

AC 220V-50Hz

Temperature Range (Low)

350 °C

Temperature Range (High)

550 °C

Features & Applications

Control Features

- Digital Temperature Display
- Adjustable Temperature
- Adjustable Airflow Volume

Primary Applications

Heat Shrinking, Paint Removal, Plastic Welding, Unfreezing
