

Digital Dual Fuel Inverter Generator

This digital inverter generator provides clean and stable power output. It features dual fuel capability, allowing it to run on either gasoline or propane.

Overview

Digital Dual Fuel Inverter Generator

This Digital Dual Fuel Inverter Generator provides a versatile and reliable power solution for recreational, home backup, and job site applications. Engineered with advanced inverter technology, it ensures clean, stable power suitable for sensitive electronics while maintaining a low total harmonic distortion (THD < 3%). Its dual-fuel capability allows for flexible operation, while the compact, suitcase-style design with telescopic handles ensures effortless portability.

Performance

Power Capacity

4000 W
Starting Watts

3200 W
Running Watts

Noise Level

62 dBA

Total Harmonic Distortion

< 3%

Features

Intelligent Features

- One-button start
- Remote control
- Automatic Transfer Switch (ATS) compatible
- Low-idle mode for fuel efficiency
- Digital data center display

Connectivity & Ports

- USB charging ports
- Parallel connection capability
- 120V AC 20A outlet
- 120V AC 30A outlet

Fuel Compatibility

Gasoline, Propane

Compliance

Certifications

EPA • CARB • CE • ROHS • EURO V
