Product Overview

Intuitive LED touch screen control panel for precise fabric care.

Professional Fabric Care

This advanced digital steam press iron offers a large surface area for efficient fabric care, making it ideal for both domestic and professional use. Featuring five distinct heat modes for various fabric types and an intuitive IMD LED touch screen with voice guidance, it ensures precise temperature and steam control. Equipped with robust safety features like an automatic power-off and a 15-second warning alarm, this iron combines high performance with reliable safety.

Performance Metrics

Professional design featuring a high-capacity steam press mechanism.

Key Performance Indicators

3 min
