

Digital Illuminance Meter

This precision instrument measures illuminance using a dedicated light sensor and digital display. It is suitable for professional applications such as lighting design, environmental monitoring, and workplace safety assessments and includes a portable case.

Product Overview

Professional Illuminance Measurement

The YY-100 Digital Illuminance Meter is a precision instrument engineered for accurate light intensity measurement. Designed for professionals in lighting design, environmental monitoring, and workplace safety, this device provides reliable data for ensuring optimal lighting conditions. Its compact design and included portable case make it an essential tool for field assessments and on-site testing.

Technical Specifications

Model	YY-100
Device Type	Digital Illuminance Meter (Illuminometer)

Features

Included Accessories

- Portable carrying case
- Light intensity sensor
- Digital display unit

Primary Applications	Lighting Design, Environmental Monitoring, Workplace Safety
