

# Digital Indicator with Tolerance Alarm

This digital indicator is a precision measuring instrument with a high-resolution LCD display. It features a tolerance alarm function and switchable units for versatile use.

## Overview

### Precision Measurement Solution

This digital indicator is engineered for high-accuracy measurement applications, utilizing advanced glass grating technology to ensure stable and reliable performance. Designed for durability in demanding industrial environments, the housing is constructed from high-strength alloy aluminum to prevent deformation. It features integrated tolerance setting and alarm capabilities, including a visual alarm light for rapid quality control assessments.

## Technical Specifications

Housing Material	High-strength alloy aluminum
Sensing Technology	Glass grating

## Quality & Compliance

Quality Assurance	Temperature Tested, Humidity Tested, Calibration Certificate Included
-------------------	---

## Features

### Key Functions

- Tolerance setting
- Tolerance alarm
- Visual alarm light
- Absolute and incremental measurement modes
- Switchable units (inches/millimeters)
