Overview

High-Performance Digital Reception

This digital loop TV antenna is engineered to deliver clear and reliable Full HD and digital TV signals. Featuring a distinct hollow loop design, it combines a modern, space-saving aesthetic with effective signal reception capabilities. The unit includes a built-in wide-band amplifier and retractable dipoles, ensuring optimized performance across both VHF and UHF frequency bands.

Performance Metrics

Signal Reception

105 dBuV

Output Level

3.5 dB

Noise Figure
