

Digital Multifunction Power Meter

This digital multifunction power meter measures from 16A-800A AC at 400V. It conforms to IEC62052/IEC62053 standards.

Product Overview

Professional Power Monitoring

The Digital Multifunction Power Meter is an essential device designed for comprehensive monitoring and measurement of electrical parameters in power distribution systems. It provides high-precision real-time readings of voltage, current, power, and energy, making it an ideal solution for industrial automation and building management. With support for standard communication protocols, this unit integrates seamlessly into existing energy management infrastructures to ensure optimized system performance.

Technical Specifications

Rated Current Range

16 A

Minimum Current

800 A

Maximum Current

Rated Voltage

400 V

Compliance & Standards

Industry Standards

IEC 62052, IEC 62053

Applications

Typical Use Cases

- Industrial automation systems
- Building energy management
- Power distribution panels
- Renewable energy monitoring
