Overview

High-Performance 360° Omni-Directional Reception

This digital outdoor TV antenna is engineered to provide comprehensive 360° signal coverage, ensuring access to free local high-definition channels from all directions. Featuring built-in high-performance smart-chip amplifiers, it delivers clear reception while maintaining a durable, weather-resistant design. Its versatile mounting options and aerodynamic housing make it an ideal solution for reliable over-the-air television viewing in various environments.

Signal & Performance

Reception Pattern

360°
