

Digital Water Usage Meter

This smart water meter is designed for accurate and reliable water consumption monitoring. It features a digital display for easy reading of water usage data.

Product Overview

Smart Digital Water Metering Solution

This advanced smart water meter provides precise consumption monitoring with a high range ratio of 160:1. Designed for long-term reliability, it features an IP68 protection rating, allowing it to operate continuously even when submerged. The device integrates seamless NB-IoT communication, enabling remote data management, automated meter reading, and flexible pricing structures for efficient utility management.
