

Digital Zoom Box Camera

This high-resolution digital zoom box camera is designed for surveillance and industrial applications. It utilizes a color CCD sensor and a digital signal processor to deliver enhanced image quality and detailed observation of distant objects with its 22x digital zoom.

Product Overview

Professional Digital Zoom Surveillance

This high-resolution digital zoom box camera is engineered for diverse surveillance and industrial imaging requirements. Equipped with an advanced Digital Signal Processor (DSP) and a high-fidelity color CCD sensor, it ensures superior image processing and precise color reproduction. The unit features a powerful 22x digital zoom, allowing for detailed observation of distant subjects, making it a versatile choice for security system integration or specialized imaging tasks.

Technical Specifications

Sensor Technology	Color CCD
Digital Zoom Capability	22 x
Image Processing	DSP, 3D Optical Function

Application Suitability

Common Applications

- Security surveillance systems
- Industrial imaging
- Distant object monitoring
- Custom integration solutions
