

Direct Drive 40L Air Compressor

This direct drive air compressor has a 40L tank and operates at 2880 RPM. With a 2.2KW motor, it achieves a pressure of 8 bar and a capacity of 200L/min.

Overview

High-Efficiency Direct Drive Compressor

This 40L Direct Drive Air Compressor is engineered for high rotational speed and efficient air delivery, making it an ideal choice for workshops and industrial applications. Designed for portability, the unit features a compact footprint and integrated wheels for easy maneuverability. It combines durable construction with energy-saving performance to ensure reliable operation for pneumatic tools and equipment.
